SAMPLE CV - Fictional demo student

SUMMARY

Computer Science student targeting a Junior DevOps internship. Project experience with Python, Git, Linux, Docker and GitHub Actions. Interested in reproducible environments, automated checks and clear operational documentation.

EDUCATION

BSc Computer Science, Luma University

2024 - present | Year 3
Relevant modules: Software Engineering, Database Systems, Networking and Statistics.

PROJECTS

GitHub Release Automation - personal learning project
Created a GitHub Actions workflow that runs Python tests on pull requests and packages a release after a version tag. Documented branch protection, build failures and the rollback procedure.

Campus Booking API - Software Engineering coursework
Built a Python FastAPI service with PostgreSQL. Added automated tests for booking conflicts and API validation. Containerized the service with Docker Compose and documented environment variables and a repeatable local setup.

Docker Networking Lab - personal learning project
Connected an API and PostgreSQL through service-name discovery on a private Compose network. Added a database health check and documented troubleshooting commands. Infrastructure automation and orchestration are future learning goals.

SKILLS

Python, SQL, Git, Linux, Docker, Docker Compose, CI/CD, GitHub Actions, PostgreSQL

CERTIFICATIONS

Git & Release Automation - Luma Learning Academy, September 2026 (sample credential)
Docker Foundations - Luma Learning Academy, September 2026 (sample credential)

EXPERIENCE

University team projects and independent learning labs. No professional employment history is claimed.
